INSURING INVESTMENTS • ENSURING OPPORTUNITIES
Two years ago, the World Bank Group began down a path of renewal and change to prepare our organization to take on its toughest challenge yet—to end extreme poverty in a single generation. At the 2013 Spring Meetings, we adopted two ambitious goals: to end extreme poverty by 2030 and to boost shared prosperity for the poorest 40 percent in developing countries.

To make us fit for this purpose, at our Annual Meetings last October, our Board of Governors approved the first strategy for the entire World Bank Group. This strategy focuses on delivery of transformational solutions, marshals our combined resources more effectively, and accelerates our collaboration with the private sector and other development partners.

The challenge is immense. To reach our end poverty goal, we have to help tens of millions of people lift themselves out of poverty each year. It is a daunting task, but if we effectively implement our strategy, we know we can achieve it.

In this Annual Report, you will learn how we have been implementing the strategy over the past year. Our four principal institutions—the International Bank for Reconstruction and Development (IBRD), the International Development Association (IDA), the International Finance Corporation (IFC), and the Multilateral Investment Guarantee Agency (MIGA)—now work together as one World Bank Group to accomplish our mission.

We have made great progress. Engagement with our country partners is now more selective, as we work closely with them to identify the best opportunities to reach our common goals. Our new global practices and cross-cutting solution areas are improving our ability to bring our clients the best global knowledge to solve their toughest challenges—and with fewer transaction costs.

Our financial structure has been updated and strengthened, growing our financial capacity while reducing expenditures and directing the savings to our clients. This year, the World Bank Group committed $65.6 billion in loans, grants, equity investments, and guarantees to its members and private businesses. Commitments from IBRD totaled $18.6 billion, while IDA, the World Bank’s fund for the poorest, made commitments of $22.2 billion. Thanks to a record $52 billion replenishment pledged by donors for the next three years, IDA will continue to make crucial investments in people so that the benefits of growth are shared by all.

Over the past two decades, 90 percent of new jobs were created by the private sector—and good jobs were by far the most effective path to escaping poverty. Our private sector arm IFC and our political risk insurance arm MIGA are ramping up their efforts to leverage private sector investment and create more jobs and economic opportunities for the poor. This year, IFC provided more than $22 billion in financing for private sector development, about $5 billion of which was mobilized from investment partners. MIGA issued $3.2 billion in political risk and credit enhancement guarantees underpinning investments, including in transformational projects.

To have a lasting impact, our investments have to be environmentally sustainable. If we don’t confront climate change, we won’t end extreme poverty. The poor are the first impacted and suffer the most from the effects of climate change. Last year we announced our plan to address climate change, and we are making investments that will protect our environment while creating a more sustainable future for our children and grandchildren.

The World Bank Group leadership and staff are united in pursuing our urgent mission, and are implementing the critical changes needed to deliver results for our clients. We are focused on improving the lives of roughly a billion people now living in extreme poverty, and seek to build a world that is more sustainable, prosperous, and just—for all of us.
GLOBAL COMMITMENTS

The World Bank Group’s support for developing countries grew sharply over the past year as the organization focused on delivering results more quickly, increasing its relevance for its clients and partners, and bringing global solutions to local challenges.

OUR IMPACT

The entire World Bank Group leveraged its strengths, expertise, and resources to help countries and other partners make a real impact on development—by driving economic growth, promoting inclusiveness, and ensuring sustainability.

### Driving Economic Growth

- **IBRD/IDA**
  - 95,000 kilometers of roads constructed and rehabilitated
  - 15.3 million people and micro, small, and medium enterprises reached with financial services
  - $6.1 billion new business loans issued by MIGA clients

- **IFC**
  - 2.6 million jobs provided
  - 94 million customers supplied with power, water, and gas

- **MiGa**
  - 52,100 jobs provided

### Promoting Inclusiveness

- **IBRD/IDA**
  - 250.9 million people received health, nutrition, and population services
  - 37.4 million beneficiaries covered by social safety net programs

- **IFC**
  - 2.9 million farmers assisted
  - 2.5 million students received educational benefits

- **MiGa**
  - 47 million people provided access to power
  - 15 million people provided access to transport

### Ensuring Sustainability

- **IBRD/IDA**
  - 903 million tons of CO2 equivalent emissions expected to be reduced annually

- **IFC**
  - 5.5 million metric tons of greenhouse emissions expected to be reduced annually
  - $18.7 billion in government revenues generated by IFC clients

- **MiGa**
  - 3.3 million people provided access to clean water
  - $1.6 billion in government revenues generated by MiGa clients

Regional breakdowns reflect World Bank country classifications.
In fiscal year 2014, we issued a total of $3.2 billion in guarantees for projects in MIGA’s developing member countries. An additional $1.8 million in guarantees was issued under MIGA-administered trust funds. This year marked the fourth consecutive year of record issuance by MIGA, with 51 percent of this new issuance falling into at least one of MIGA’s priority areas. At the end of the year, MIGA’s gross exposure was $12.4 billion.

- MIGA’s Board of Directors approved the Agency’s strategy for fiscal years 2015-2017
- The Board also approved an administrative budget for MIGA for fiscal year 2015
- Myanmar became the Agency’s 180th member
- MIGA used its non-honoring of financial obligations product for a capital markets transaction for the first time

MIGA Highlights

In fiscal year 2014, we issued a total of $3.2 billion in guarantees for projects in MIGA’s developing member countries. An additional $1.8 million in guarantees was issued under MIGA-administered trust funds. This year marked the fourth consecutive year of record issuance by MIGA, with 51 percent of this new issuance falling into at least one of MIGA’s priority areas. At the end of the year, MIGA’s gross exposure was $12.4 billion.

- MIGA’s Board of Directors approved the Agency’s strategy for fiscal years 2015-2017
- The Board also approved an administrative budget for MIGA for fiscal year 2015
- Myanmar became the Agency’s 180th member
- MIGA used its non-honoring of financial obligations product for a capital markets transaction for the first time
In 2014, the World Bank Group adopted a joint strategy for dealing with impediments to ending extreme poverty and boosting shared prosperity. One of the strategy’s key elements underscores the essential role private sector investment can play working alongside public sector support to bear down on the most challenging development issues client countries face, such as job creation, infrastructure deficits, and climate change.

MIGA’s role has become increasingly valuable in delivering results to achieve these twin goals as demonstrated by the increased demand for our political risk insurance and credit enhancement products that facilitate the expansion of private investment into emerging markets. In fiscal year 2014, MIGA issued a record $3.2 billion in new guarantees while our gross exposure reached $12.4 billion. MIGA’s added value stems from our ability to mobilize private sector investment in environments that are often beyond the risk tolerance of commercial sources of capital.

This past fiscal year, MIGA worked with various stakeholders to develop our own strategy that aligns our objectives with the World Bank Group’s twin goals and underscores our aspiration to achieve significant development impact beyond what we can do alone. To achieve this, MIGA will need to be financially sustainable by prudently managing our risks, covering operating costs, and creating financial latitude by growing the Agency’s capital base.

At the same time, MIGA will continue to work with its reinsurance partners and other external entities to provide support on projects. Internally, we will enhance collaboration across the World Bank Group through engagement in the Country Partnership Framework discussions to identify high impact opportunities where we can make a difference. Additionally, we continue to underpin our investment guarantees with strong environmental and social standards to ensure long-term sustainability of the projects we support.

We will optimize opportunities presented by our expanded political risk insurance and credit enhancement products, as well as broadened client base, to support investment in fragile and conflict-affected markets, IDA countries, middle-income countries, and transformational projects through increased business development across sectors and regions. In this way, MIGA will further increase its contribution to the twin goals pursued by the World Bank Group.

mIGA backs power generation and distribution in Cameroon

With demand for electricity growing by 5 to 6 percent per year, Cameroon urgently needs greater efficiencies. MIGA is supporting investments in three power sector projects in the West African country that will contribute to the power sector’s stability, continuity, and recovery. The investments in the national electric utility and two existing power generation projects will help meet growing demand for electricity, enhance the distribution network, extend service to unserved areas, and improve the overall efficiency and operation of the sector.

MIGA supports power generation and distribution in Cameroon

MIGA insures first wind power plant in Honduras

MIGA is supporting clean energy generation in Honduras by insuring the 24-megawatt expansion of the existing 102-megawatt Cerro de Hula wind project located 20 kilometers south of Tegucigalpa. By providing additional energy to the grid, the project will further reduce the country’s dependence on traditional fossil fuel generation and avoid the creation of 280,000 tons per year of carbon emissions. Cerro de Hula remains the largest wind power plant in Central America.

MIGA support to Hungary Exim assists country’s exporters

MIGA’s credit enhancement support to Hungary’s Export-Import Bank (Exim) helped Exim achieve savings that it will use to directly assist Hungarian exporters. MIGA’s backing for a €400-million bond issue by Exim raised the bond issue from non-investment to investment grade. Covering this bond issue represented an important milestone for MIGA, representing the first time the Agency used its non-honoring of financial obligations cover for a capital markets transaction. It demonstrated how MIGA’s products can be used innovatively to support market-based approaches to enhance development.

World Bank Group helps transform Lebanon’s power sector

Lebanon’s power sector suffers from chronic supply shortages in the face of growing demand and poor infrastructure. As part of the government’s reform program, upgrading of the transmission distribution network and installation of advanced metering infrastructure is being carried out by the private sector—with considerable results. MIGA is providing guarantees to Butec International Cyprus and El Sewedy Electrometer Group of Egypt, which are implementing service upgrades in northern Lebanon.

World Bank Group collaborates on Vietnam national highway 20

Vietnam’s National Highway 20 connects Ho Chi Minh City, the political and economic center of southern Vietnam, with the Central Highlands, one of the country’s poorest regions that has tremendous potential as a source of agricultural products, mineral deposits, and tourism destinations. MIGA is providing a guarantee covering a loan from a syndicate of commercial banks to finance the rehabilitation of a severely deteriorated section of the road. This project leverages the World Bank’s technical support, local presence, and capacity building and MIGA’s ability to mobilize commercial bank lending to achieve maximum results for Vietnam.

Visit www.miga.org/FY14projects for more project information.
**Development Results**

MIGA’s mission is to support economic growth, reduce poverty, and improve people’s lives. In order to achieve this, the Agency needs a clear understanding of the development outcomes of the projects it supports. MIGA’s Development Effectiveness Indicator System (DeIS) collects a common set of indicators from clients to demonstrate results across all projects: volume of investment catalyzed, direct employment, taxes paid, and value of locally procured goods. It also measures sector-specific indicators.

MIGA’s $3.2 billion issuance in fiscal year 2014 is expected to catalyze an additional $2.6 billion in public and private co-investment. Here are highlights of the development results expected from projects supported by MIGA guarantees signed in fiscal year 2014:

- **Investment Catalyzed**: $5.8 billion
- **Gross Issued**: $3.2 billion
- **Direct Employment**: 7,635 people
- **Locally Procured Goods**: $597 million
- **Yearly Taxes and Fees**: $462 million
- **Provided with Power**: 26 million people

Visit www.miga.org/development-results for more information.

**Governance**

**MIGA’s Board**

A Council of Governors and a Board of Directors, representing 180 member countries, guide the programs and activities of MIGA. Each country appoints one governor and one alternate. MIGA’s corporate powers are vested in the Council of Governors, which delegates most of its powers to a Board of 25 Directors. The Directors meet regularly at the World Bank Group headquarters in Washington, DC, where they review and decide on investment projects and oversee general management policies.

**Accountability**

**Independent Evaluation Group**

The Independent Evaluation Group (IEG) assesses MIGA’s strategies, policies, and projects to improve the Agency’s development results. IEG is independent of MIGA management and reports its findings to MIGA’s Board of Directors and the Committee on Development Effectiveness.

IEG’s reports and recommendations are publicly disclosed on its website at ieg.worldbankgroup.org.

**Compliance Advisor Ombudsman**

The Office of the Compliance Advisor Ombudsman (CAO) is the independent accountability mechanism for MIGA and IFC and reports directly to the President of the World Bank Group. The CAO responds to complaints from people affected by MIGA and IFC-supported business activities, with the goal of enhancing social and environmental outcomes on the ground and fostering greater public accountability of both agencies.
