## Reform making it easier to do business

- Starting a business
- Getting credit
- Protecting minority investors
- Paying taxes

## Change making it more difficult to do business

- Enforcing contracts
- Resolving insolvency

---

**Note:** Most indicator sets refer to a case scenario in the largest business city of an economy, though for 11 economies the data are a population-weighted average for the two largest business cities. For some indicators a result of “no practice” may be recorded for an economy; see the data notes for more details. In starting a business, procedures (number), time (days) and cost (% of income per capita) are calculated as the average of both men and women. For the posting index, a result of “not applicable” may be recorded for an economy.

Note: Most indicator sets refer to a case scenario in the largest business city of an economy, though for 11 economies the data are a population-weighted average for the two largest business cities. For some indicators a result of "no practice" may be recorded for an economy; see the data notes for more details. In starting a business, procedures (number), time (days) and cost (% of income per capita) are calculated as the average of both men and women. For the postfilling index, a result of "not applicable" may be recorded for an economy.

Note: Most indicator sets refer to a case scenario in the largest business city of an economy, though for 11 economies the data are a population-weighted average for the two largest business cities. For some indicators a result of “no practice” may be recorded for an economy; see the data notes for more details. In starting a business, procedures (number), time (days) and cost (% of income per capita) are calculated as the average of both men and women. For the postfiling index, a result of “not applicable” may be recorded for an economy.

#### Enforcing contracts (rank)

| Score for enforcing contracts (0–100) | 48.43 |
| Time (days) | 695 |
| Cost (% of claim value) | 34.0 |
| Quality of judicial processes index (0–18) | 5.5 |

#### Resolving insolvency (rank)

| Score for resolving insolvency (0–100) | 60.85 |
| Time (years) | 2.3 |
| Cost (% of estate) | 11.0 |
| Recovery rate (cents on the dollar) | 37.6 |
| Strength of insolvency framework index (0–16) | 13.0 |

### Note:

Most indicator sets refer to a case scenario in the largest business city of an economy, though for 11 economies the data are a population-weighted average for the two largest business cities. For some indicators a result of "no practice" may be recorded for an economy; see the data notes for more details. In starting a business, procedures (number), time (days) and cost (% of income per capita) are calculated as the average of both men and women. For the postfiling index, a result of "not applicable" may be recorded for an economy.

Note: Most indicator sets refer to a case scenario in the largest business city of an economy, though for 11 economies the data are a population-weighted average for the two largest business cities. For some indicators a result of "no practice" may be recorded for an economy; see the data notes for more details. In starting a business, procedures (number), time (days) and cost (% of income per capita) are calculated as the average of both men and women. For the postfiling index, a result of "not applicable" may be recorded for an economy.

Note: Most indicator sets refer to a case scenario in the largest business city of an economy, though for 11 economies the data are a population-weighted average for the two largest business cities. For some indicators a result of “no practice” may be recorded for an economy; see the data notes for more details. In starting a business, procedures (number), time (days) and cost (% of income per capita) are calculated as the average of both men and women. For the postfiling index, a result of “not applicable” may be recorded for an economy.

**Note:** Most indicator sets refer to a case scenario in the largest business city of an economy, though for 11 economies the data are a population-weighted average for the two largest business cities. For some indicators a result of "no practice" may be recorded for an economy; see the data notes for more details. In starting a business, procedures (number), time (days) and cost (% of income per capita) are calculated as the average of both men and women. For the posting index, a result of "not applicable" may be recorded for an economy.

Note: Most indicator sets refer to a case scenario in the largest business city of an economy, though for 11 economies the data are a population-weighted average for the two largest business cities. For some indicators a result of “no practice” may be recorded for an economy; see the data notes for more details. In starting a business, procedures (number), time (days) and cost (% of income per capita) are calculated as the average of both men and women. For the postfiling index, a result of “not applicable” may be recorded for an economy.

Note: Most indicator sets refer to a case scenario in the largest business city of an economy, though for 11 economies the data are a population-weighted average for the two largest business cities. For some indicators a result of “no practice” may be recorded for an economy; see the data notes for more details. In starting a business, procedures (number), time (days) and cost (% of income per capita) are calculated as the average of both men and women. For the postfiling index, a result of “not applicable” may be recorded for an economy.

- Reform making it easier to do business
- Change making it more difficult to do business
Resolving insolvency indicators a result of “no practice” may be recorded for an economy; see the data notes for more details. In starting a business, procedures (number), time (days) and cost (% of income per capita) are calculated as the average of both men and women. For the postfiling index, a result of “not applicable” may be recorded for an economy.

P情境: 在这张图片中展示了2020年全球营商环境指数报告中的部分数据。报告中列出了各个国家的营商环境得分、成本、时间等因素。例如，马里（MALAWI）在开办企业（Starting a business）方面排名第111位，而马尔代夫（MADAGASCAR）在该方面排名第16。报告还列出了获取电力（Getting electricity）、注册财产（Registering property）、保护少数投资者（Protecting minority investors）等各个领域的指标。这些数据对于了解各国的营商环境和投资环境具有重要价值。
Dealing with construction permits

**Dealing with construction permits (rank)** 62
Score for dealing with construction permits (0–100) 73.00
Procedures (number) 10
Time (days) 140
Cost (% of warehouse value) 0.4
Building quality control index (0–15) 7.0

Getting electricity

**Getting electricity (rank)** 145
Score for getting electricity (0–100) 55.60
Procedures (number) 6
Time (days) 75
Cost (% of income per capita) 228.1
Reliability of supply and transparency of tariffs index (0–8) 0

Registering property

**Registering property (rank)** 175
Score for registering property (0–100) 39.97
Procedures (number) 6
Time (days) 57
Cost (% of property value) 15.7
Quality of land administration index (0–30) 8.5

Starting a business

**Starting a business (rank)** 71
Score for starting a business (0–100) 89.17
Procedures (number) 6
Time (days) 12
Cost (% of income per capita) 4.0
Minimum capital (% of income per capita) -1.3

GNI per capita (US$)

**GNI per capita (US$)** 23,810
Population 465,292

Trading across borders

Trading across borders (rank) 41
Score for trading across borders (0–100) 91.01
Time to export Documentary compliance (hours) 3
Border compliance (hours) 24
Cost to import Documentary compliance (US$) 25
Border compliance (US$) 325

Resolving insolvency

Resolving insolvency (rank) 79
Score for resolving insolvency (0–100) 45.43
Time (years) 3.6
Cost (% of estate) 18.0
Recovery rate (cents on the dollar) 26.5
Strength of insolvency framework index (0–16) 9.0

Note: Most indicator sets refer to a case scenario in the largest business city of an economy, though for 11 economies the data are a population-weighted average for the two largest business cities. For some indicators a result of "no practice" may be recorded for an economy; see the data notes for more details. In starting a business, procedures (number), time (days) and cost (% of income per capita) are calculated as the average of both men and women. For the postfilling index, a result of "not applicable" may be recorded for an economy.
Resolving insolvency

- **Score for resolving insolvency (0–100)**: 55.93
  - **Trading across borders (rank)**: 60.30
  - **Population**: 4,420,184

Resolving insolvency

- **Score for resolving insolvency (0–100)**: 8.0
  - **Trading across borders (rank)**: 60.30
  - **Population**: 4,420,184

Note: Most indicator sets refer to a case scenario in the largest business city of an economy, though for 11 economies the data are a population-weighted average for the two largest business cities.

For some indicators a result of "no practice" may be recorded for an economy; see the data notes for more details. In starting a business, procedures (number), time (days) and cost (% of income per capita) are calculated as the average of both men and women. For the postfiling index, a result of "not applicable" may be recorded for an economy.

Note: Most indicator sets refer to a case scenario in the largest business city of an economy, though for 11 economies the data are a population-weighted average for the two largest business cities. For some indicators a result of “no practice” may be recorded for an economy; see the data notes for more details. In starting a business, procedures (number), time (days) and cost (% of income per capita) are calculated as the average of both men and women. For the postfilling index, a result of “not applicable” may be recorded for an economy.

Note: Most indicator sets refer to a case scenario in the largest business city of an economy, though for 11 economies the data are a population-weighted average for the two largest business cities. For some indicators a result of “no practice” may be recorded for an economy; see the data notes for more details. In starting a business, procedures (number), time (days) and cost (% of income per capita) are calculated as the average of both men and women. For the postfilining index, a result of “not applicable” may be recorded for an economy.
Starting a business (rank) 3

### Note
Most indicator sets refer to a case scenario in the largest business city of an economy, though for 11 economies the data are a population-weighted average for the two largest business cities. For some indicators a result of “no practice” may be recorded for an economy; see the data notes for more details. In starting a business, procedures (number), time (days) and cost (% of income per capita) are calculated as the average of both men and women. For the postfiling index, a result of “not applicable” may be recorded for an economy.

Note: Most indicator sets refer to a case scenario in the largest business city of an economy, though for 11 economies the data are a population-weighted average for the two largest business cities. For some indicators a result of “no practice” may be recorded for an economy; see the data notes for more details. In starting a business, procedures (number), time (days) and cost (% of income per capita) are calculated as the average of both men and women. For the postfiling index, a result of “not applicable” may be recorded for an economy.
