- *The World Bank Group's Knowledge Work and Activities*
- *Working with the World Bank Group*
- *The Future Role of the World Bank Group in Sudan*

- *Background Information*

II. Methodology

From February to June 2018, 461 stakeholders of the WBG in Sudan were invited to provide their opinions on the WBG's work in the country by participating in a Country Opinion Survey. Participants were drawn from the Office of the President, Prime Minister; office of a Minister; office of a Parliamentarian; ministries/ministerial departments/implementation agencies; Project Management Units (PMUs) overseeing implementation of WBG projects; consultants/contractors working on WBG-supported projects/programs; local governments; bilateral and multilateral agencies; private sector organizations; private foundations; the financial sector/private banks; NGOs and community-based organizations; the media; independent government institutions; trade unions; faith-based groups; youth groups; academia/research institutes/think tanks; the judiciary branch; and other organizations.

A total of 430 stakeholders participated in the survey (93% response rate). Respondents either received and completed the questionnaires via the online survey platform Qualtrics or completed the questionnaires with a representative from the local fielding agency.

Every country that engages in the Country Opinion Survey (COS) must include specific indicator questions that will be aggregated for the World Bank Group's annual Corporate Scorecard. These questions are identified throughout the survey report.

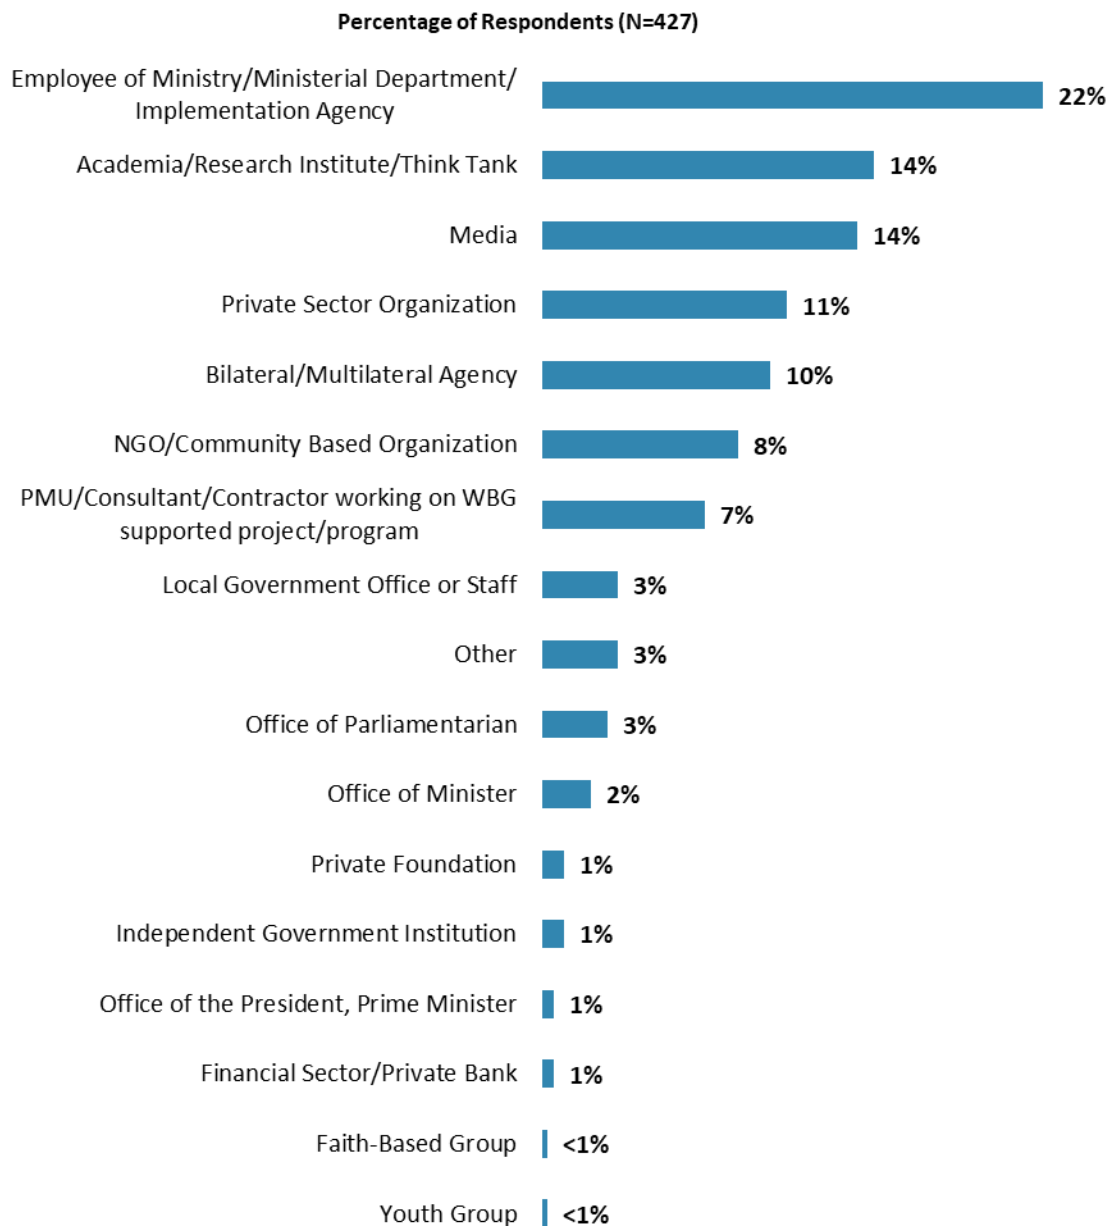

The results in this year's Country Survey were compared to those in the Country Survey conducted in FY'15 (response rate was 62%, N=273). Data were weighted to reach the same stakeholder composition in both years, which allows for year comparisons. Stakeholder groups which were not present in both fiscal years were not included in the comparison. Respondents who belonged to the "other" stakeholder category were not included either. As a result, mean ratings, percentages of respondents, and the total number of respondents in both years are slightly different from those of the original data reported in the FY'15 COS report and the non-weighted data presented in appendices A, B, C, D, and F. For the weighted stakeholder breakdown and year comparison results, please refer to Appendix E (page 102).

III. Demographics of the Sample

- For further analyses, respondents from the Office of the President/Prime Minister were combined with respondents from the office of a minister; respondents from the financial sector/private banks were combined with those from private sector organizations; respondents from NGOs/community based organizations, private foundations, faith-based groups, and youth groups were combined in the “CSO” category; and the small number of respondents from independent government institutions were included in the “Other” category. There were no respondents from trade unions and the judiciary branch.

Familiarity with the World Bank Group

- **Year comparison:** Respondents in this year's Country Survey and the FY'15 Country Survey had statistically similar levels of familiarity with the WBG (weighted mean in FY'18 = 5.8; weighted mean in FY'15 = 6.1)¹.
- Respondents' levels of familiarity with the WBG were significantly, strongly correlated with their ratings of the WBG's overall effectiveness in Sudan, and significantly, moderately correlated with their ratings of the extent to which the WBG plays a relevant role in development in Sudan and the extent to which the WBG contributes to the country's development results.

"How familiar are you with the work of the World Bank Group in Sudan?"
(1 - "Not familiar at all", 10 - "Extremely familiar")

¹ Please refer to Appendix E (page 102) for more details on weighting. The means in the chart were calculated based on un-weighted data.

IV. General Issues Facing Sudan

Headed in the Right Direction²

- **Year comparison:** This year's respondents were significantly less likely to believe that Sudan is headed in the right direction compared to respondents in the FY'15 Country Survey.

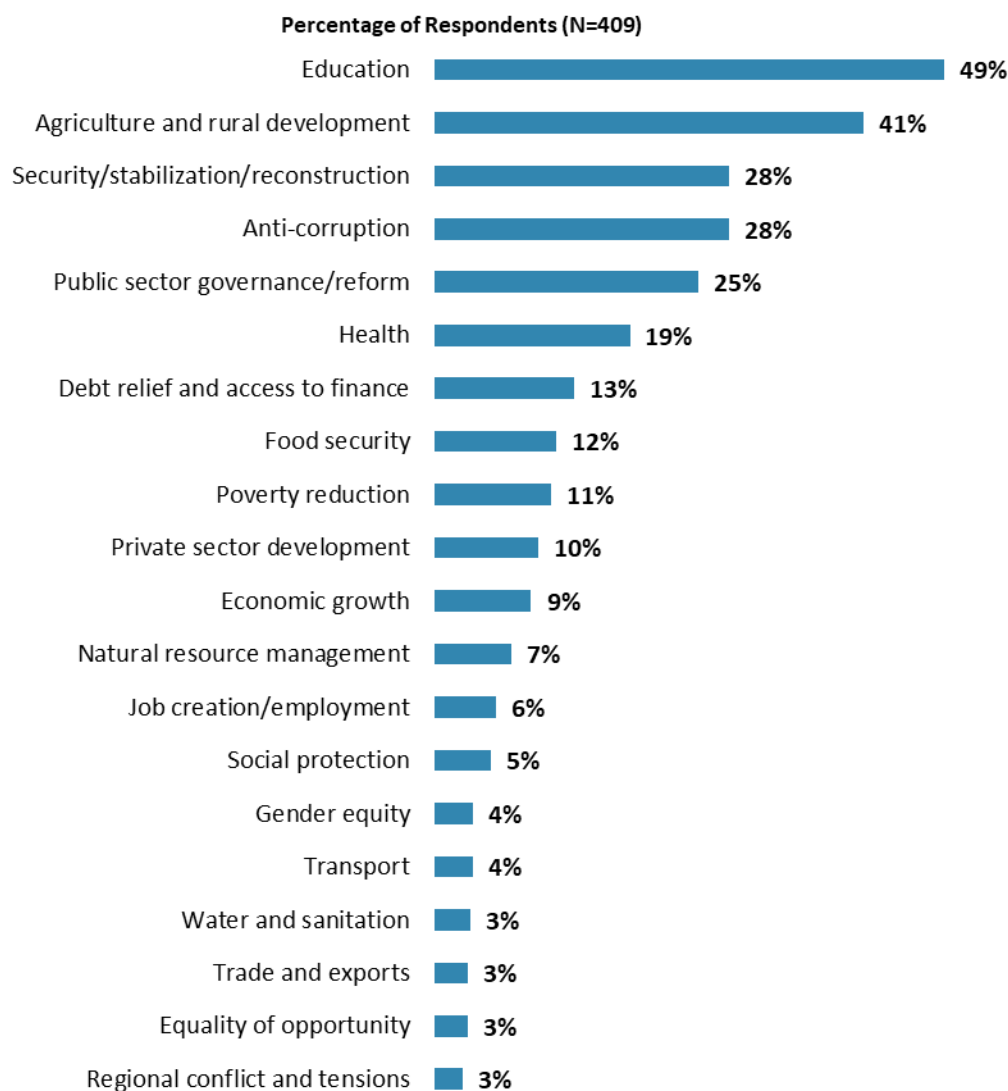

² Percentages presented in the chart were calculated based on weighted data from FY'18 and FY'15.

IV. General Issues Facing Sudan (continued)

Development Priority

- **Year comparison:** Respondents in the previous FY'15 Country Survey indicated that the most important development priorities in Sudan were “*security/stabilization/reconstruction*” (40%), “*education*” (28%), and “*food security*” (24%).
- **Specialization:** Respondents who identified their primary specialization of work as “*education*” (14% of the sample) were significantly *more* likely to indicate that “*education*” was the most important development priority in Sudan, compared to the rest of respondents in other areas of work (education specialists = 75%; others = 45%).

"Listed below are a number of development priorities in Sudan. Please identify which of the following you consider the most important development priorities in Sudan. (Choose no more than THREE)" (Respondents chose from a list. Responses combined. Top 20 out of 34 response options shown.)

VI. Sectoral Effectiveness (continued)

Drivers of Effectiveness

To determine the key drivers of respondents' ratings of the World Bank Group's overall effectiveness and ratings of its ability to help achieve development results in Sudan, bivariate correlational analyses were conducted using respondents' ratings of the thirty-four specific areas of effectiveness.

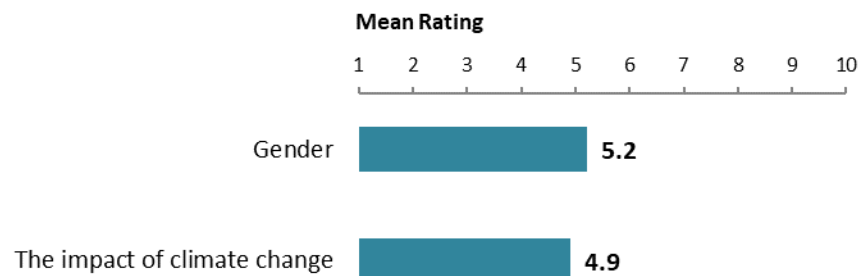

Correlational analyses, however, are not able to tell us exactly what is causing respondents' ratings of the World Bank Group's overall effectiveness or ratings of its ability to help achieve development results. Rather, these analyses tell us that as ratings of effectiveness in one area increase, respondents' ratings of the WBG's overall effectiveness increase, or as ratings of effectiveness in one area increase, ratings of the WBG's ability to help achieve development results increase. Thus, it can be inferred that respondents' perceptions of effectiveness in one specific area are related to, or drive, respondents' perceptions of the WBG's overall effectiveness or perceptions of the WBG's ability to help achieve development results.

- Overall Effectiveness: Those specific areas with the highest Pearson Product-Moment correlations were determined to be the most closely related to perceptions of the WBG's overall effectiveness, suggesting that ratings of effectiveness in those specific areas are drivers of perceptions of the WBG's overall effectiveness in Sudan. The areas determined to be key drivers from these analyses were:
 - The WBG's effectiveness at education; and
 - The WBG's effectiveness at social cohesion.
- Achieving Development Results: Those specific areas with the highest Pearson Product-Moment correlations were determined to be the most closely related to perceptions of the WBG's ability to help achieve development results in Sudan, suggesting that ratings of effectiveness in those specific areas are drivers of perceptions of the WBG's ability to help achieve development results. The area determined to be key driver from these analyses was:
 - The WBG's effectiveness at security/stabilization/reconstruction;
 - The WBG's effectiveness at economic growth;
 - The WBG's effectiveness at education; and
 - The WBG's effectiveness at food security.
