I. Objectives

This survey was designed to assist the World Bank Group (WBG) in gaining a better understanding of how stakeholders in Bangladesh perceive the WBG. The survey explored:

- *Overall Context*
- *Overall Attitudes toward the World Bank Group*
- *World Bank Group's Work and Engagement on the Ground*
- *World Bank Group's Support in Development Areas*
- *World Bank Group's Knowledge Work and Activities*
- *The Future Role of the World Bank Group in Bangladesh*
- *Communication and Information Sharing*
- *Background Information*

II. Methodology

From January to March 2022, 827 stakeholders of the WBG in Bangladesh were invited to provide their opinions on the WBG's work in the country by participating in a Country Opinion Survey. Participants were drawn from the office of the President, Prime Minister; office of a minister; office of a member of parliament/legislative body; employees of ministries/ministerial departments/implementation agencies; Project Management Units (PMUs) overseeing implementation of WBG projects; consultants/contractors working on WBG-supported projects/programs; local governments; independent government institutions; the judicial system; state-owned enterprises; bilateral and multilateral agencies; private sector organizations; the financial sector/private banks; private foundations; NGOs and community based organizations; trade unions; faith-based groups; youth groups; academia/research institutes/think tanks; the media; and other organizations.

A total of 351 stakeholders participated in the survey (42% response rate). Respondents completed the questionnaire with a representative from the local fielding agency, received the questionnaire via a courier or hand delivery and returned it accordingly, or they completed the questionnaire online.

Every country that engages in the Country Opinion Survey (COS) must include specific indicator questions that will be aggregated for the World Bank Group's annual Corporate Scorecard. These questions are identified throughout the survey report.

Note that the body of the report presents data on selected questions of the survey questionnaire. Please refer to Appendix A for data on all survey questions. Appendices B and C present data on selected questions. Additional data breakdowns are available upon request.

II. Methodology (continued)

The results in this year's Country Survey were compared to those in the Country Survey conducted in FY'19 (response rate was 47%, N=366). Comparing responses across Country Surveys reflect changes in attitudes over time, but also changes in respondent samples and changes to the survey instrument itself. To reduce the influence of the latter factor, only those questions with similar response scales/options were analyzed. To reduce the influence of the former, the samples from FY '19 and FY '22 were weighted to have equivalent stakeholder groupings, allowing for more statistically reliable comparisons. Due to this weighting, mean ratings, percentages of respondents, and the total number of respondents in both years are slightly different from those of the original data reported in the FY'19 COS report and the non-weighted data presented in this report.
