Acknowledgments

The Little Data Book on Gender 2019 is a collaborative effort between the Development Data Group of the Development Economics Vice Presidency and the Gender Group.

The Little Data Book on Gender 2019 was prepared by Bala Bhaskar Naidu Kalimili, Haruna Kashiwase, Charles Yao Kouadio Kouame, Hiroko Maeda, Ana Florina Pirlea, Espen Beer Prydz, Umar Serajuddin, Emi Suzuki, Dereje Wolde, and Malarvizhi Veerappan of the Development Data Group, and Eliana Rubiano Matulevich of the Gender Group. Production of the book was coordinated by Jomo Tariku. The work was carried out under the management of Haishan Fu and Caren Grown.

Foreword

Foreword from Senior Director of the Gender Group, Caren Grown, and Director of the Development Data Group, Haishan Fu

At the World Bank Group, we recognize the pivotal role gender equality plays in sustainable development. Improving living standards, reducing poverty, and building resilience all require data to facilitate evidence-based policy decisions. Making progress towards gender equality is no exception.

The Little Data Book on Gender 2019 illustrates the progress towards gender equality for 217 economies around the world. It provides comparable statistics for women and men for the years 2000 and 2017 across a range of indicators covering education, health and related services, economic structure, participation and access to resources, public life and decision making, and agency, enabling readers to readily compare economies. This edition also features online country tables—to be updated quarterly—making it easier than ever to see how women and men are faring across a range of global indicators and to track progress over time.

The data reveal remarkable progress in recent decades towards gender equality, notably in education and health. The most recent data show global primary school completion rates at 91 percent for boys and 90 percent for girls, with lower secondary completion rates at 76 percent for boys and 77 percent for girls. Gains, however, have been distributed unequally between richer and poorer countries. Gender gaps to the detriment of girls emerge in low-income countries, mostly in Sub-Saharan Africa, while in some Latin American countries, boys are less likely than girls to complete primary and secondary school.

Both women's and men's lifespans have shown marked global improvements: for women, the increase was from 70 years in 2000 to 74 in 2017, compared to an increase from 66 to 70 years for men. In every country in the world, women outlive men. Increases in female life expectancy have been driven in part by a decline in the risk of mortality during childbirth. Globally, there were an estimated 303,000 maternal deaths in 2015, a decline of 31 percent from 2000. Nonetheless, maternal mortality remains high in Sub-Saharan Africa, where the rate stood at 547 per 100,000 live births in 2015.

Notwithstanding relatively large gains in education and health, gender inequality in access to economic opportunities has remained stubbornly persistent. On virtually every global measure, women are more economically excluded than men. Women are more likely than men to be engaged in low productivity activities, work more in informal employment, and transition more frequently between being in employment and out of the labor force.

Globally, women's labor force participation has not increased. In fact, it decreased from 51 percent in 2000 to 48 percent in 2018. In terms of access to finance, account ownership overall continues to expand but gender inequalities persist. While 71 percent of men have an account at a financial institution, 64 percent of women do. This gap of 7 percentage points was also present in 2014 and 2011. In low and middle income economies, the gender gap remains at 8 percentage points.

These data illustrate significant stories of progress and challenges still to solve. Yet *The Little Data Book on Gender* is only an entry point to the rich set of statistics that track gender equality. Therefore, we encourage readers to explore the fuller, curated data and analysis tools on the World Bank's Gender Data Portal at datatopics.worldbank.org/gender.

Data notes

The data in this book are for 2000 and 2017 or the most recent year unless otherwise noted in the table or the glossary.

- Growth rates are proportional changes from the previous year unless otherwise noted.
- Figures in italics indicate data for years or periods other than those specified.

Symbols used:

.. indicates that data are not available or that aggregates cannot be calculated because of missing data.

0 or 0.0 indicates zero or small enough that the number would round to zero at the displayed number of decimal places.

\$ indicates current U.S. dollars.

Lettered notes on some country tables can be found in the notes on page 233.

Data are shown for economies with populations greater than 30,000 or for smaller economies if they are members of the World Bank. The term *country* (used interchangeably with *economy*) does not imply political independence or official recognition by the World Bank but refers to any economy for which the authorities report separate social or economic statistics.

The cutoff date for data is April 22, 2019.

Regional tables

The country composition of regions is based on the World Bank's analytical regions for FY 19 and may differ from common geographic usage.

East Asia and Pacific

American Samoa, Australia, Brunei Darussalam, Cambodia, China, Fiji, French Polynesia, Guam, Hong Kong SAR, China, Indonesia, Japan, Kiribati, Democratic People's Republic of Korea, Republic of Korea, Lao People's Democratic Republic, Macao SAR, China, Malaysia, Marshall Islands, Federated States of Micronesia, Mongolia, Myanmar, Nauru, New Caledonia, New Zealand, Northern Mariana Islands, Palau, Papua New Guinea, Philippines, Samoa, Singapore, Solomon Islands, Thailand, Timor-Leste, Tonga, Tuvalu, Vanuatu, Vietnam

Europe and Central Asia

Albania, Andorra, Armenia, Austria, Azerbaijan, Belarus, Belgium, Bosnia and Herzegovina, Bulgaria, Channel Islands, Croatia, Cyprus, Czech Republic, Denmark, Estonia, Faroe Islands, Finland, France, Georgia, Germany, Gibraltar, Greece, Greenland, Hungary, Iceland, Ireland, Isle of Man, Italy, Kazakhstan, Kosovo, Kyrgyz Republic, Latvia, Liechtenstein, Lithuania, Luxembourg, Moldova, Monaco, Montenegro, Netherlands, North Macedonia, Norway, Poland, Portugal, Romania, Russian Federation, San Marino, Serbia, Slovak Republic, Slovenia, Spain, Sweden, Switzerland, Tajikistan, Turkey, Turkmenistan, Ukraine, United Kingdom, Uzbekistan

Latin America and the Caribbean

Antigua and Barbuda, Argentina, Aruba, The Bahamas, Barbados, Belize, Bolivia, Brazil, British Virgin Islands, Cayman Islands, Chile, Colombia, Costa Rica, Cuba, Curaçao, Dominica, Dominican Republic, Ecuador, El Salvador, Grenada, Guatemala, Guyana, Haiti, Honduras, Jamaica, Mexico, Nicaragua, Panama, Paraguay, Peru, Puerto Rico, Sint Maarten (Dutch part), St Kitts and Nevis, St Lucia, St Martin (French part), St Vincent and the Grenadines, Suriname, Trinidad and Tobago, Turks and Caicos Islands, Uruguay, República Bolivariana de Venezuela, Virgin Islands (U.S.)

Middle East and North Africa

Algeria, Bahrain, Djibouti, Arab Republic of Egypt, Islamic Republic of Iran, Iraq, Israel, Jordan, Kuwait, Lebanon, Libya, Malta, Morocco, Oman, Qatar, Saudi Arabia, Syrian Arab Republic, Tunisia, United Arab Emirates, West Bank and Gaza, Republic of Yemen

North America

Bermuda, Canada, United States

South Asia

Afghanistan, Bangladesh, Bhutan, India, Maldives, Nepal, Pakistan, Sri Lanka

Sub-Saharan Africa

Angola, Benin, Botswana, Burkina Faso, Burundi, Cabo Verde, Cameroon, Central African Republic, Chad, Comoros, Democratic Republic of Congo, Republic of Congo, Côte d'Ivoire, Equatorial Guinea, Eritrea, Eswatini, Ethiopia, Gabon, The Gambia, Ghana, Guinea, Guinea-Bissau, Kenya, Lesotho, Liberia, Madagascar, Malawi, Mali, Mauritania, Mauritius, Mozambique, Namibia, Niger, Nigeria, Rwanda, São Tomé and Príncipe, Senegal, Seychelles, Sierra Leone, Somalia, South Africa, South Sudan, Sudan, Tanzania, Togo, Uganda, Zambia, Zimbabwe

Income group tables

For operational and analytical purposes the World Bank's main criterion for classifying economies according to income groups is gross national income (GNI) per capita. Each economy in *The Little Data Book on Gender* is classified as low income, lower middle income, upper middle, or high income. Note: Classifications are fixed during the World Bank's fiscal year (ending on June 30), thus countries remain in the categories in which they are classified for one year irrespective of any revisions to their per capita income data during this time.

Low-income economies are those with a GNI per capita of \$995 or less in 2017.

Lower middle-income economies are those with a GNI per capita of more than \$996 but less than \$3,895.

Upper middle-income economics are those with a GNI per capita of more than \$3,896 but less than \$12,055.

High-income economies are those with a GNI per capita of \$12,056 or more.

Country tables

China

Unless otherwise noted, data for China do not include data for Hong Kong SAR, China; Macao SAR, China; or Taiwan, China.

Cyprus

GNI and data calculated using GNI refer to the area controlled by the government of Cyprus.

Georgia

GNI and population data and data calculated using GNI and population exclude Abkhazia and South Ossetia.

Kosovo, Montenegro, and Serbia

Data for each country are shown separately where available. However, some indicators for Serbia prior to 2006 include data for Montenegro; these data are noted in the tables. Moreover, data for most indicators for Serbia from 1999 onward exclude data for Kosovo, which in 1999 became a territory under international administration pursuant to UN Security Council Resolution 1244 (1999). Kosovo became a member of the World Bank on June 29, 2009, and its data are shown where available.

Moldova

GNI and population data and data calculated using GNI and population exclude Transnistria.

Morocco

GNI and data calculated using GNI include Former Spanish Sahara.

South Sudan and Sudan

South Sudan declared its independence on July 9, 2011. Data are shown separately for South Sudan where available. However, data reported for Sudan to 2011 include South Sudan unless otherwise noted.

Tanzania

GNI data and data calculated using GNI refer to mainland Tanzania only. For more information, see data.worldbank.org.

Afghanistan

Glossary

Account at a financial institution is the percentage of respondents ages 15 and older who report having an account (by themselves or together with someone else) at a bank or another type of financial institution. (World Bank, the Global Financial Inclusion database)

Adolescent fertility rate is the number of births per 1,000 women ages 15–19. (United Nations Population Division and World Bank)

Agency is the capacity to make decisions about one's own life and act on them to achieve a desired outcome, free of violence, retribution, or fear. (Klugman, J., L. Hanmer, S. Twigg, T. Hasan, J. McCleary-Sills, and J. Santamaria. 2014. *Voice and Agency: Empowering Women and Girls for Shared Prosperity*. Washington, DC: World Bank)

Births attended by skilled health staff are the percentage of deliveries attended by personnel trained to give the necessary supervision, care, and advice to women during pregnancy, labor, and postpartum period; to conduct deliveries on their own; and to care for newborns. (United Nations Children's Fund, and ICF International)

Children in employment are children ages 7–14 who are involved in any economic activity for at least one hour in the reference week of the survey. (Understanding Children's Work project based on data from ILO, UNICEF and the World Bank)

Contraceptive use, modern methods is the percentage of women who are practicing, or whose sexual partners are practicing, at least one modern method of contraception. It is usually measured for women ages 15–49 who are married or in union. Modern methods of contraception include female and male sterilization, oral hormonal pills, the intra-uterine device (IUD), the male condom, injectables, the implant (including Norplant), vaginal barrier methods, the female condom and emergency contraception. (United Nations Population Division, United Nations Children's Fund, and ICF International)

Employment in agriculture is the proportion of employment in agriculture—division 1 (ISIC 2), categories A and B (ISIC 3) or category A (ISIC 4), and includes hunting, forestry, and fishing—in total employment. Data in the tables are modeled estimates. Data listed for 2017 are for 2018. (International Labour Organization, ILOSTAT database)

Employment in industry is the proportion of employment in industry—divisions 2–5 (ISIC 2), categories C–F (ISIC 3) or categories B–F (ISIC 4), and includes mining and quarrying, manufacturing, construction, and public utilities (electricity, gas, and water)—in total employment. Data in the tables are modeled estimates. Data listed for 2017 are for 2018. (International Labour Organization, ILOSTAT database)

Employment in services is the proportion of employment in service—divisions 6–9 (ISIC 2) or categories G–Q (ISIC 3) or categories G–U, and includes wholesale and retail trade and restaurants and hotels; transport, storage, and

communications; financing, insurance, real estate, and business services; and community, social, and personal services in total employment. Data in the tables are modeled estimates. Data listed for 2017 are for 2018. (International Labour Organization, ILOSTAT database)

Employment to population ratio is the proportion of a country's population that is employed. Ages 15 and older are generally considered the working-age population and ages 15–24 are generally considered the youth population. Data in the tables are modeled estimates. Data listed for 2017 are for 2018. (International Labour Organization, ILOSTAT database)

Female share of employment in senior and middle management is the proportion of females in total employment in senior and middle management. It corresponds to major group 1 in both ISCO-08 and ISCO-88 minus category 14 in ISCO-08 (hospitality, retail and other services managers) and minus category 13 in ISCO-88 (general managers), since these comprise mainly managers of small enterprises. (International Labour Organization, ILOSTAT database)

Female share of graduates from Science, Technology, Engineering and Mathematics (STEM) programs is the number of female graduates expressed as a percentage of the total number of graduates from the STEM programs. (United Nations Educational, Scientific, and Cultural Organization Institute for Statistics)

Firms with a female top manager refer to the percentage of firms have a woman as the top manager. The top manager refers to the highest ranking manager or CEO of the firm, the person who makes the key decisions on a day-to-day basis. This person may be the firm's owner if she (the owner) also works as the manager of the firm. (World Bank, Enterprise Surveys)

Firms with female participation in ownership refers to the percentage of firms that have at least one woman among the firm's principal owners. (World Bank, Enterprise Surveys)

GNI is the sum of value added by all resident producers plus any product taxes (less subsidies) not included in the valuation of output plus net receipts of primary income (compensation of employees and property income) from abroad. Data are in current U.S. dollars. GNI, calculated in national currency, is usually converted to U.S. dollars at official exchange rates for comparisons across economies, although an alternative rate is used when the official exchange rate is judged to diverge by an exceptionally large margin from the rate actually applied in international transactions.

In calculating gross national income (GNI—formerly referred to as GNP) in U.S. dollars for certain operational and analytical purposes, the World Bank uses the Atlas conversion factor instead of simple exchange rates. The purpose of the Atlas conversion factor is to reduce the impact of exchange rate fluctuations in the cross-country comparison of national incomes. The Atlas conversion factor for any year is the average of a country's exchange rate for that year and its exchange rates for the two preceding years, adjusted for the difference between the rate of inflation in the country and international

Glossary

inflation; the objective of the adjustment is to reduce any changes to the exchange rate caused by inflation. International inflation is measured using the change in a deflator based on the International Monetary Fund's unit of account, special drawing rights (or SDRs). Known as the "SDR deflator," it is a weighted average of the GDP deflators (in SDR terms) of China, Japan, the United Kingdom, the United States, and the euro area, converted to U.S. dollar terms; weights are the amount of each currency in one SDR unit. GNI in U.S. dollars (Atlas method) is calculated by applying the Atlas conversion factor to a country's GNI in current prices (local currency). (World Bank)

GNI per capita is the gross national income (GNI), converted to U.S. dollars using the World Bank Atlas method, divided by the midyear population. (World Bank)

Gross tertiary enrollment ratio is the ratio of total enrollment in tertiary level, regardless of age, to the population of the age group that officially corresponds to the tertiary education. (United Nations Educational, Scientific, and Cultural Organization Institute for Statistics)

Gross tertiary graduation ratio is the number of graduates from first degree programs (at ISCED 6 and 7) expressed as a percentage of the population of the theoretical graduation age of the most common first degree program. (United Nations Educational, Scientific, and Cultural Organization Institute for Statistics)

Internet users are the proportion of individuals who have used the Internet (from any location) in the last 3 months. Internet can be used via a computer, mobile phone, personal digital assistant, games machine, digital TV, etc. Age groups may differ by country. (International Telecommunication Union)

Labor force participation rate is the proportion of the population that is economically active: all people who supply labor for the production of goods and services during a specified period. Ages 15 and older are generally considered the working-age population and ages 15–24 are generally considered the youth population. Data in the tables are modeled estimates. Data listed for 2017 are for 2018. (International Labour Organization, ILOSTAT database)

Life expectancy at birth is the number of years a newborn infant would live if prevailing patterns of mortality at the time of its birth were to stay the same throughout its life. (United Nations Population Division, national statistical offices, Eurostat, United Nations Statistics Division, United States Census Bureau, Secretariat of the Pacific Community, and World Bank).

Lower secondary completion rate is measured as the gross intake ratio to the last grade of lower secondary education. It is calculated as the number of new entrants in the last grade of lower secondary education, regardless of age, divided by the population at the entrance age for the last grade of lower secondary education. (United Nations Educational, Scientific, and Cultural Organization Institute for Statistics)

Maternal mortality ratio is the number of women who die from pregnancy-related causes while pregnant or within 42 days of pregnancy termination per 100,000 live births. The data are estimated with a regression model using information on the proportion of maternal deaths among non-AIDS deaths in women ages 15–49, fertility, birth attendants, and GDP. Data listed for 2017 are for 2015. (United Nations Maternal Mortality Estimation Inter-agency Group, World Health Organization, United Nations Children’s Fund, United Nations Population Fund, World Bank Group, and United Nations Population Division)

Maternity leave refers to leave related to the birth of a child that is only available to the mother; it does not cover parental leave that is available to both parents. Paid maternity leave is the mandatory minimum number of calendar days that legally must be paid by the government, the employer, or both. (World Bank Group, Women, Business and the Law database)

Mobile account is the percentage of respondents ages 15 and older who report personally using a mobile money service in the past 12 months. (World Bank, Global Financial Inclusion database)

Net primary enrollment rate is the ratio of children of official school age who are enrolled in primary school to the population of the age group that officially corresponds to the primary education. (United Nations Educational, Scientific, and Cultural Organization Institute for Statistics)

Net secondary enrollment rate is the ratio of children of official school age who are enrolled in secondary school to the population of the age group that officially corresponds to the secondary education. (United Nations Educational, Scientific, and Cultural Organization Institute for Statistics)

Population is the de facto definition of population, which counts all residents regardless of legal status or citizenship. The values shown are midyear estimates. (United Nations Population Division, national statistical offices, Eurostat, United Nations Statistics Division, United States Census Bureau, Secretariat of the Pacific Community, and World Bank).

Population living below \$1.90 a day is the share (percent) of the population living on less than \$1.90 a day at 2011 international prices. (World Bank, DEC and Poverty GP)

Pregnant women receiving prenatal care are the percentage of women attended at least once during pregnancy by skilled health personnel for reasons related to pregnancy. (United Nations Children’s Fund and ICF International)

Prevalence of HIV is the percentage of people ages 15–24 who are infected with HIV. (Joint United Nations Programme on HIV/AIDS).

Glossary

Prevalence of smoking is the percentage of people ages 15 and over who currently smoke any tobacco product on a daily or non-daily basis. It excludes smokeless tobacco use. The rates are age-standardized. Data listed for 2017 are for 2016. (World Health Organization Global Health Observatory Data Repository)

Primary completion rate is measured as the gross intake ratio to the last grade of primary education. It is calculated as the number of new entrants in the last grade of primary education, regardless of age, divided by the population at the entrance age for the last grade of primary education. (United Nations Educational, Scientific, and Cultural Organization Institute for Statistics)

Progression to secondary school refers to the number of new entrants to the first grade of secondary school in a given year as a percentage of the number of students enrolled in the final grade of primary school in the previous year (minus the number of repeaters from the last grade of primary education in the given year). (United Nations Educational, Scientific, and Cultural Organization Institute for Statistics)

Proportion of women in ministerial level positions is the proportion of women in ministerial or equivalent positions (including deputy prime ministers) in the government. Prime Ministers/Heads of Government are included when they hold ministerial portfolios. Vice Presidents and heads of governmental or public agencies are excluded. Data listed for 2017 are for 2016. (Inter-Parliamentary Union)

Saved any money last year is the percentage of respondents ages 15 and older who report personally saving or setting aside any money for any reason and using any mode of saving in the past 12 months. (World Bank, the Global Financial Inclusion database)

Seats held by women in national parliament is the percentage of parliamentary seats in a single or lower chamber occupied by women. Data listed for 2017 are for 2018. (Inter-Parliamentary Union)

Sex ratio at birth refers to male births per female births. (United Nations Population Division, World Population Prospects)

Total fertility rate is the number of children that would be born to a woman if she were to live to the end of her childbearing years and bear children in accordance with age-specific fertility rates of the specified year. (United Nations Population Division, national statistical offices, Eurostat, United Nations Statistics Division, United States Census Bureau, Secretariat of the Pacific Community, and World Bank)

Under-five mortality rate is the probability per 1,000 live births that a newborn baby will die before reaching age five, if subject to age-specific mortality rates of the specified year. (United Nations Inter-agency Group for Child Mortality Estimation, United Nations Children's Fund, World Health Organization, World Bank, and United Nations Population Division)

Unemployment rate is the share of labor force without work but available for and seeking employment. Ages 15 and older are generally considered the working-age population and ages 15–24 are generally considered the youth population. Data in the tables are modeled estimates. Data listed for 2017 are for 2018. (International Labour Organization, ILOSTAT database)

Vulnerable employment is contributing family workers and own-account workers as a percentage of total employment. Data in the tables are modeled estimates. Data listed for 2017 are for 2018. (International Labour Organization, ILOSTAT database)

Wage and salaried workers are those workers who hold the type of jobs defined as “paid employment jobs,” where the incumbents hold explicit (written or oral) or implicit employment contracts that give them a basic remuneration that is not directly dependent upon the revenue of the unit for which they work. Data in the tables are modeled estimates. Data listed for 2017 are for 2018. (International Labour Organization, ILOSTAT database)

Women are able to work in the same industries as men indicates whether there are no (full or partial) restrictions on women working in mining, construction, manufacturing, energy, water, agriculture and transportation sectors. Data listed for 2017 are for 2018. (World Bank Group, Women, Business and the Law database)

Women first married by age 18 is the percentage of women ages 20–24 who were first married by age 18. (United Nations Children’s Fund and ICF International)

Women’s share of part-time employment is the female share of total part-time workers. Part time employment refers to regular employment in which working time is substantially less than normal. (International Labour Organization, ILOSTAT database)

Women’s share of population ages 15+ living with HIV is the proportion of women in total population ages 15+ who are living with HIV. (Joint United Nations Programme on HIV/AIDS)

Youth literacy rate is the percentage of people ages 15 to 24 who can both read and write with understanding a short simple statement about their everyday life. (United Nations Educational, Scientific, and Cultural Organization Institute for Statistics)
