Objectives

This survey was designed to assist the World Bank Group (WBG) in gaining a better understanding of how stakeholders in Cabo Verde perceive the WBG. The survey explored the following questions:

- 1. Overall Context:** How familiar are they with the WBG? How much do they trust the WBG?
- 2. Key Indicators:** What opinion do key stakeholders have of the WBG when it comes to its effectiveness, relevance, alignment with Cabo Verde's development priorities, and other key indicators? Are opinions improving or declining?
- 3. Development Priorities:** What areas of development are perceived to be the most important? Have the priorities changed over the past three years? How effective is the WBG perceived to be in these areas?
- 4. Engagement and Work on the Ground:** How is the WBG perceived as a development partner? Are opinions improving or declining?
- 5. Communication and Outreach:** What are the preferred communication channels and which channels are reported to be used the most? Are there differences among stakeholder groups in terms of preferred channels?
- 6. Message Recall:** What key topics that the WBG communicates do stakeholders recall? Is there a relationship between message recall and views of the WBG's work?

Detailed Methodology

From **May 2023 to August 2023**, a total of **266** stakeholders of the WBG in Cabo Verde were invited to provide their opinions about the WBG’s work in the country by participating in a Country Opinion Survey (COS). Participants were drawn from the Office of the President, Prime Minister, Minister, Office of a Parliamentarian (National Assembly, Legislative body), Government Institutions, Local Governments, Bilateral/ Multilateral Agencies, Private Sector, Civil Society, Academia, and the Media.

A total of **84 stakeholders participated in the survey (32% response rate)**. Respondents completed the questionnaire via an online platform.

The results of this year’s survey were compared to the FY20 COS Survey with a response rate of 42% (N=141).

Comparing responses across Country Surveys reflects changes in attitudes over time, but also changes in respondent samples, changes in methodology, and changes to the survey instrument itself. To reduce the influence of the latter factor, only those questions with similar response scales/options were analyzed. Additionally, this year, the COS project utilized the Pulse Survey format, which is a shorter version conducted online by the COS team. The list of respondents was identified and provided solely by the country team, which indicates a shift in the stakeholder composition compared to FY20. In the previous survey, up to 20% of the respondents were provided by a local fielding agency. These differences in stakeholder composition between the two years should be taken into consideration when interpreting the results of the past-year comparison analyses.

Key statistically significant findings (tested at the research standard of $p < .05$) are noted throughout the report.

Breakdowns for individual questions by stakeholder group can be found in the “Cabo Verde COS FY23 Appendices with data breakdowns.xlsx” file published in the WBG Microdata Library, along with the survey microdata and this report.
